## DETAILED ACTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al (WO 98/03218) in view of Anderson et al (USPN 5500180) as set forth in the Office action mailed 7/25/07.
- Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al (WO 98/03218) in view of Anderson et al (USPN 5500180) as applied to claim 10 above and further in view of Wang et al (5500181) as set forth in the Office action mailed 7/25/07.
- 4. Claims1 4-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al (WO 98/03218) in view of Anderson et al (USPN 5500180). The above teachings of Wang et al and Anderson et al are incorporated hereinafter. In regard to claim 14-15, such limitations are a mere obvious matter of choice dependent on the desired final product and molding equipment availability and of little patentable consequence to the claimed process since it is not a manipulative feature or step of the claimed process. Further, the claimed limitations are well-known in the balloon-catheter and molding art. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the claimed limitations into the process of Wang et al (modified) in order to form a durable and high-quality balloon.

5. Applicant's arguments filed 8/5/08 have been fully considered but they are not persuasive. Applicant argues that Wang et al (WO 98/03218) does not teach annealing the tube itself. This argument is misplaced because instant claim 1 does not require annealing the tube prior to its expansion. Instant claim 1 is broad enough to include annealing the tube before, during, or after its expansion.

 THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
